
Last few pics in Latest Images directory (guest)

Posted by Shmendrick - 2017/01/03 18:17

Can anyone see the last few images in the "Latest Images" folder off of the Main Menu? I can see everything fine up to Bojay's Baby Santa, then the rest are just links that don't ever resolve into a pic. They are all posted by Guest User, so I think something might have been done wrong somehow? I have turned off my script blocking software and the result is the same.

Thanks in advance for any help or confirmation (of a posting problem).

I can't see them either.

Removed.

I was kind of hoping the poster would try again.

The poster contacted me earlier. It didn't look like he did anything wrong in the uploading process, so I redirected him to Heidegger.

I guess he will look into it soon.

I just tried posting something as a test. Same result. Look like there's something deeper than a simple wrongly made submission. :huh:

I would suggest saving up any recent image/story/Private Message you don't want to lose, in case Heidegger is forced to use an older back up of the website in the fixing process.

Hopefully that's not necessary - I think we might be in camel/straw/back territory if we lose a bunch of content again.

I'm not sure what the issue was but the album Good Girl 56 seemed to be the problem. I removed it and now the upload feature works correctly. I have a copy of what was uploaded there and may try putting it back up in a couple of days,

Thanks. ;)

There also seem to be something off with the "Shower, by Aogami" album in the latest submission. When opening one of the images, it show a very long path to a comic album in which it actually isn't. I don't recall it being like this when it was first posted. Was it?

And now the images seems broken, as well as a part of the comic section. Wtf is with this gallery system crashing every now and then? :dry:

I have this one backed up since I posted it last time, but I hope I'm not going to have to repost a lot of comics. :huh:

I believe everything is fixed again. I don't know what triggers these issues, but I'm pretty certain that this is all one issue with the same source - not a collection of bugs that inevitably lead to the failure of the world economy or even a few of the albums in the gallery,

^^

Look like it's all right and back to normal now. What a relief! :lol: Thanks Heid.

Edit : Nice comics' finds, Tazz. :] 'Just reordered them. ;)

The more the merrier. Thanks a lot for properly naming the pages in order, by the way. It make the reordering way easier. ;)
